# Store and protect large device fleets with our High-Density Rack Systems.

Our ready-to-customize racks can easily manage up to 120 devices using a combination of Datamation solutions. Every High-Density Rack we ship is:

INDUSTRIAL-STRENGTH
Built durable and functional so your devices are efficiently stored and fully protected.

ADAPTABLE
Capable of holding a variety of device types, sizes and cases on multiple shelves.

CUSTOMIZABLE
Choose from our standard rack system or we'll design the exact rack you need.

We can help right-size a configuration to fit your devices and your space.

Steel mesh locking front door; glass option available

Rear door enables access to onboard power for easy cabling and connectivity

Integrated ventilation fans for added device protection

Industrial-grade swivel and locking wheels

Secure UniDock Intelligent Docking Stations and UniDock Trays in any combination (up to 4 shelves and 96 devices) or Mobile Device Trays (up to 5 shelves and 120 devices)

Side doors for additional convenient access

Solid USA-sourced steel construction; anti-microbial powder coat finishing
