

UniDock® Trays: More device charging flexibility and power per square inch.

Organizations with mixed fleets of mobile devices can now streamline essential management tasks in one compact spot. With small footprints and industry-leading ease of use, our gen 3 UniDock Trays make it fast and easy for busy employees to keep all your tablets, devices and phones charged and synced.

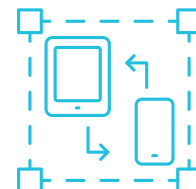

FLEXIBLE

Each of our Trays holds different mixes of devices—with or without rugged cases—so you can ensure you get the best fit for your fleet and your workspace.

FAST AND SIMPLE

Enhanced cable management and intuitive LED status lights provide connect-and-go simplicity so your employees can stay focused and productive.

FUTURE-PROOF

Our flexible cable management system makes it swap-and-go easy to accommodate different devices from your base tray investment as your fleet evolves.

In healthcare, every second counts. We make it fast and simple to keep essential devices charged and ready—reliably.

UniDock® products manage over 1 million healthcare devices worldwide.

Mobile devices improve efficiency and customer experiences in retail—that's why we ensure they are always ready to work for you.

UniDock® products power up one of the nation's largest athletic apparel companies.

Specifications

Common attributes for UniDock® Tray 20, Tray 10 and Tray 10T:

- Fits nearly any mobile device and case—including Zebra, Honeywell, Spectralink and Beam—even with rugged medical-grade cases
- Charge and sync with or without case
- Compatibility: iOS, MacOS, Android, Windows, Linux
- Cable options: USB-C, Lightning or a combination of both
- Datamation will pre-install cables at an additional charge
- Cables are secured so they stay with the Tray; they can be easily exchanged to accommodate different devices and cases
- Trays may be daisy-chained on a single host connection
- Durable steel construction, proudly made in the USA
