Component Base accessory:
Shared device check-in and checkout, secured.

Combining form and function, the Component Base accessory for UniDock® solutions lets you simplify and secure shared device check-in and checkout to reduce device loss and IT burden. The Component Base offers flexible support for both UniDock Intelligent Docking Stations and UniDock Trays, and is available for both the 10 and 20 unit products.

For UniDock Intelligent Docking Stations

When every second counts, essential devices must be charged, ready and easy to access. The Component Base and Badge Reader make it tap-and-go simple for any user to grab their device, then get right back to their day.

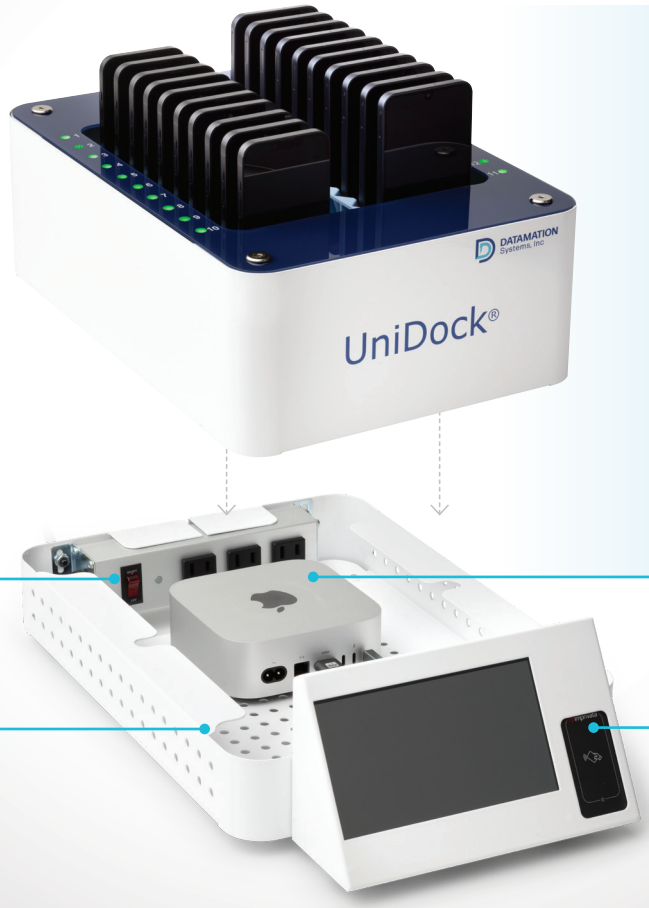

COMPONENT BASE SPECS:

UniDock-10:

8.4" W x 14.25" D x 5.8" H
4 lbs. 5 oz.

UniDock-20:

11.25" W x 16" D x 5.8" H
6 lbs.

3-outlet power strip

Durable steel construction, proudly made in the USA

Host computer and cables are securely and neatly stored:

The Component Base's storage compartment accommodates a variety of Mac and PC form factors as well as additional components such as the SouthCo lock module and cable harness.

Supported computers include Apple Mac Mini, Nuk, HP Elite and Dell SFF (not included with the Component Base).

Optional LCD with badge reader* for tap-and-go integration with Mobile Application Management (MAM) solutions.

DATAMATION Systems, Inc

For UniDock Trays

Managing mixed fleets of devices just got easier. Power up your UniDock Tray solution with added device security—without adding complexity. The Component Base makes it connect-and-go simple for anyone to grab their device, then get right back to their day.
